Testing of your pH-neutral chemical product "AIXTRACTOR[®]" for regeneration of wells according to DVGW-Standards W 319 and W 130

Ladies and Gentlemen,

we have obtained the revised draft of your product and application description for AIXTRACTOR[®] and confirm, that the suggested necessary changes and additions are implemented.

This leads, in addition to the test results according to DVGW-Standards W 319 and W 130, to the result that the described profile of requirements is fulfilled. This means, that your product is positively tested according to both standards.

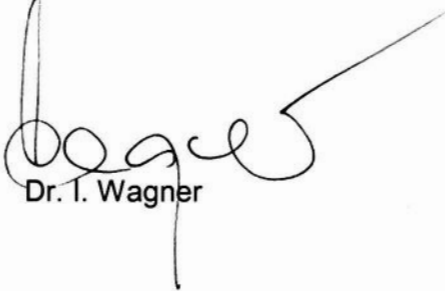

Because there is actually no certification procedure for these products and a certification is so far not common, we do not issue any test report or test certificate.

If you should see a need, for internal use, to require itemized measurement data, we would ask you to give us notice, than we would put together the data especially for the test according to DVGW-Standard W 319.

We remain with our best regards,

TZW KARLSRUHE

PRÜFSTELLE WASSER

A handwritten signature in black ink, appearing to read 'Dr. T. Wagner', is written over the printed name. The signature is stylized and includes a long horizontal stroke that extends to the right.

Dr. T. Wagner
